

Engineering touches every part of human life

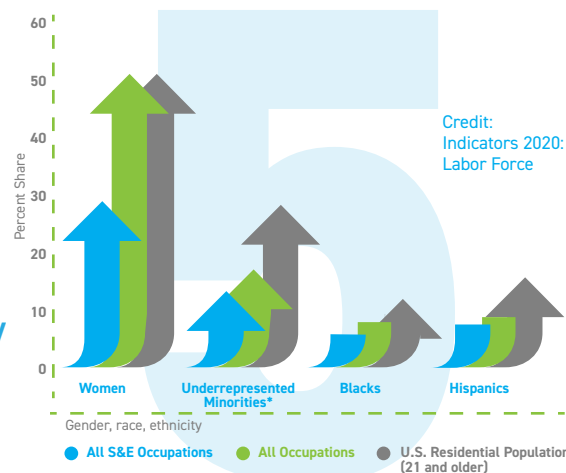

The ASME Foundation's philanthropic programs form a powerful arc of support for every phase of a young engineer's journey, from initial inspiration and learning through early career engagement and nurturing first innovations.

Education that Inspires: Emphasizing the E in STEM

Solving the world's great challenges requires insight and innovation from the full spectrum of humanity. That begins with creating equitable access to **quality STEM education for members of groups currently underrepresented in STEM fields.**

Underserved minorities include individuals who are Black, Hispanic, or American Indian or Alaska Native – whose representation in S&E education or occupations is smaller than their representation in the U.S. population.

ASME inspires the **next generation** with K-12 curriculum, support for college students, and opening pathways to rewarding technical careers for those with two-year degrees and other certifications.

Careers that Matter: Engineering the Future

Engineers and technical professionals, especially during their early years, need access to information, connections, and opportunities—resources that ASME expertly provides.

The world critically needs socially conscious **innovators** to address its most pressing problems. **ASME Foundation** fuels passion in engineers and technicians to seek meaningful careers.

ASME's **Careers that Matter** provides the support to guide young people as they strive to create purposeful and relevant careers in engineering and technology.

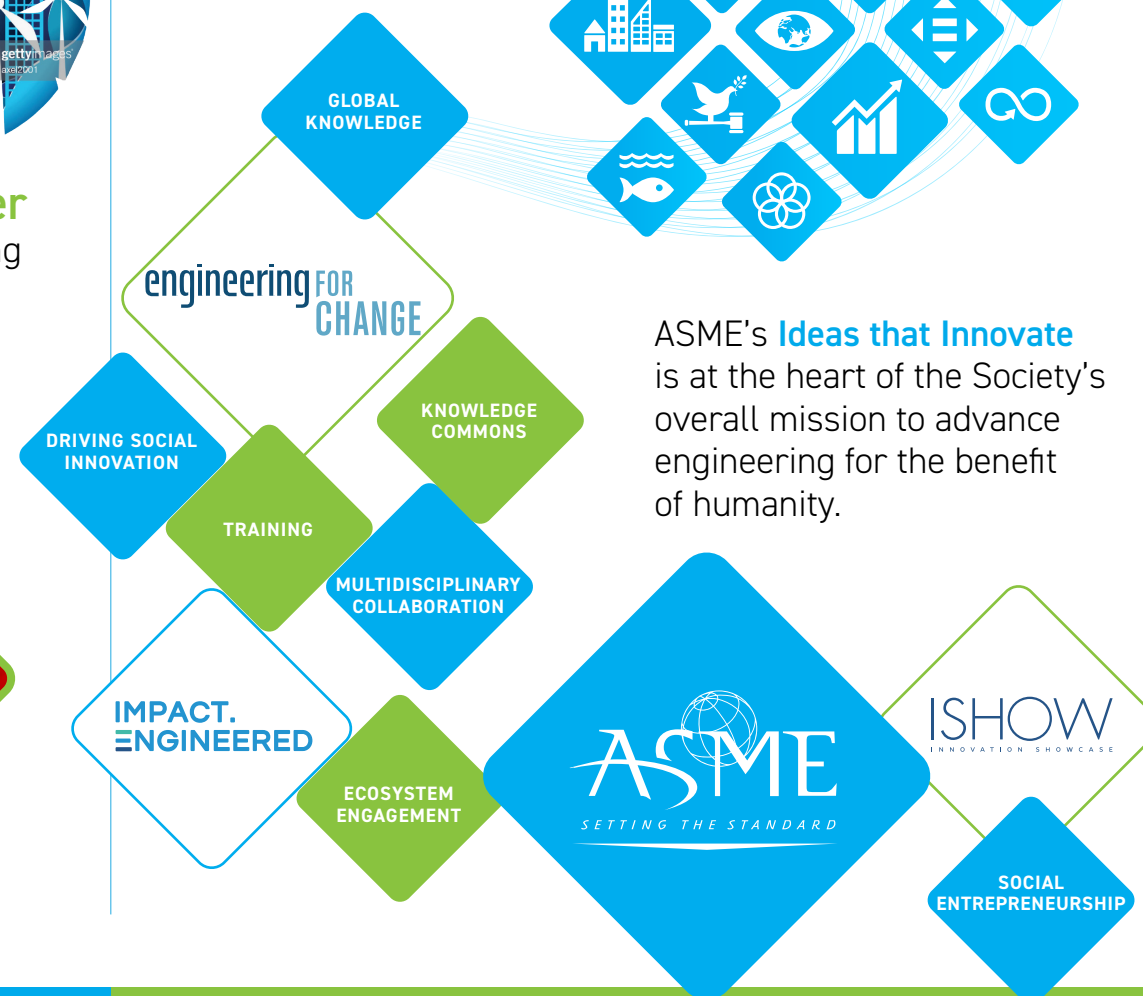

Ideas that Innovate: Improving Quality of Life

Of the UN Sustainable Development Goals, **mechanical engineers** will help drive social innovation in **solving a vast majority.**

ASME's **Ideas that Innovate** is at the heart of the Society's overall mission to advance engineering for the benefit of humanity.

With your help, the ASME Foundation is empowering a more diverse and creative next generation of engineers and technical professionals. When you donate to the Foundation, you are supporting engineers at every stage of their careers and advancing engineering for the benefit of humanity.
